Md. Nurul Ferdous	

OBJECTIVE

Devote my sincere dedication and hard working along with my experience in various technologies to be an effective and efficient resource for any kind of challenge.

PROFESSIONAL SUMMARY

Over two years experience in software development using PHP, Java, .NET and various technologies covering the technical areas including distributed application , client-server services and web application.

- ⇒ 2+ years experience in PHP, MySQL and some frameworks
- ⇒ 2+ years experience in C++
- ⇒ 2+ years experience in Java/Jsp/J2EE
- ⇒ 2+ years experience in .NET with C#, VB.NET and ASP

SUMMARY OF TECHNICAL SKILL

Programming Languages	Gnu C/C++, Java, PHP, Perl, VB.NET, C#, ADO.NET
GUI Toolkits	.NET, Java/Swing, GTK, XFC, wxWidgets, Perl-GTK, QT, Dreamweaver, NetBeans
Web frameworks	CodeIgniter, CakePHP, jQuery, Struts, Dojo, jMaki
Web scripts	AJAX, JavaScript, DHTML, XML, CSS
RDBMS	MySQL, MS-Access, SQL-Server, PGSql

PROFESSIONAL EXPERIENCE (As Full-time Employee)

Bangladesh Internet Press Limited	:	November 01 2008 to till date.
Role	:	Programmer
Platform	:	PHP & MySQL, .NET, Java, Embedded Linux
Project	:	Web and Desktop Application

Responsibilities:

- Develop embedded application as per customer's requirements.
- Read software requirements specification and architecture thoroughly
- Understand clearly the requirements specification and architecture for each software
- Understand and analyze modular and textual level architecture for embedded, server and application software
- Prepare schedules for both individual module and/or the total software as a whole as and when

- required
- Develop production-level codes and maintain standard coding convention
- Test both the individual module and/or the total software as a whole as and when required
- Prepare implementation documentation for both individual module and/or the total software as a whole as and when required
- Research any topics related to embedded, server and application software

Projects:

Built several web applications for Bangladesh Internet Press Limited and complete web sites.

S@ifur's	:	September 2006 to till December 2008
Role	:	Team Lead
Platform	:	PHP & MySQL, .NET, Java, Embedded Linux, Gnu C/C++
Project	:	Web and Desktop Applications

Responsibilities:

- Develop embedded application as per customer's requirements.
- Read software requirements specification and architecture thoroughly
- Understand clearly the requirements specification and architecture for each software
- Understand and analyse modular and textual level architecture for embedded, server and application software
- Prepare schedules for both individual module and/or the total software as a whole as and when required
- Develop production-level codes and maintain standard coding convention
- Test both the individual module and/or the total software as a whole as and when required
- Prepare implementation documentation for both individual module and/or the total software as a whole as and when required
- Research any topics related to embedded, server and application software
- Responsible for liaising with all employees (software engineers, database developers and web developers) at BIPL

Projects:

Built some web applications for S@ifur's and complete web sites

- www.saifurs.org
- www.edunews24.com
- www.jobnews24.com (under construction)
- www.iluvfotoz.com (under construction)
- www.koreafellowship.com (under construction)
- www.blog.saifurs.org
- www.easewithmoney.com
- www.feelgoodabundant.com
- www.neillongley.com
- Built software named Student Management System for effective student management.
- Developed software for Teacher Scheduling in a cost effective way.
- Worked as a team member on making a 3D Digitizer with Mr. Reaz Uddin Mandal (Lecturer RU).

Education:

Pursuing BSc in CSE	continued
International Diploma in Software Engrr NIIT Jessore	76%
HSC in Science (1997), Nasirabad College, Mymensingh	58%
SSC in Science (1994), Mukul Niketan High School, Mymensingh	74%

About me:

I have a positive, "can-do" attitude. I relish tackling new classes of problems with ingenuity and dogged tenacity! When working I enjoy my job and love to make and have a friendly and energetic work environment

I believe in documentation and unit-testing and really, really try to do it. I keep abreast of new technologies, subscribe to (and generally read) innumerable academic journals, industry magazines and all the trade rags.

I love to travel and spend time with my family whenever possible. In my off time, I read books, try to write something and try to sing (though it has been often regarded as a curse to my audience).
